

TellerMetrix®

We're so much more than a software vendor.

In a world of cutbacks and cost-containment, Tellermetrix continues to invest in the future. Our latest optional modules include eBSA™ Electronic CTR/SAR Batch Filing, Affinity™ Marketing, and expanded e-Deposit™. Many new features, such as TMTellermessag^e™ enhance our core e-Scope® product. And of course, we are constantly leveraging new technology to improve system performance.

eBSA™ enables electronic batch filing of CTR/SAR forms.

eDeposit™ offers integrated remote capture and access to a growing number of banks and their processors.

Affinity™ puts the power of integrated marketing/loyalty programs in the hands of the largest and smallest of operators.

TMTellermessag^e™ helps you guide teller behavior at the window.

We will soon introduce the next generation of bill payment with the new Pay-O-Matic® platform, which will include a same-day credit option for your customers -- all with POM's easy-to-understand reporting.

In order to assist our customers in this difficult time, we have offered hardware and operating system upgrades at cost, worked with customers to achieve manageable terms and cash flow opportunities, and implemented customized support programs. As industry consolidation has increased, we have helped customers merge data from diverse systems, streamline databases, cost-effectively implement our MDR central database and management solutions, and integrate tools to meet current challenges.

But it does not stop there. We support the industry by developing workshops for FiSCA and FSCNY, donating to industry scholarship programs, maintaining organization memberships and actively participating in meetings, advertising in industry publications, attending ACAMS programs, and providing insights through Rich Kelsky's column in Cheklist Magazine.

If you want to know more about what drives us – and what makes us so much more than a software provider - call us. We will be happy to spend time with you to discuss what we do and how we do it, issues facing the industry, and why we are truly in a league of our own.

Join us at the FiSCA 25th Anniversary Event in Chicago.
